

Mária Kozová

The 14th International Symposium On Problems of Landscape - Ecological Research

**IMPLEMENTATION OF LANDSCAPE ECOLOGY
IN THE NEW AND CHANGING CONDITIONS**

4 - 7 October 2006

Hotel Academia, Stará Lesná, High Tatras Mts.
Slovak Republic

Institute of Landscape Ecology, Slovak Academy of Sciences, Bratislava
Slovak Association for Landscape Ecology - IALE SK
Slovak Ecological Society
Department of Ecology and Environmentalistic, Faculty of Natural Sciences,
Constantine the Philosopher University, Nitra

Main topics of the Symposium

- Past and current landscapes - changes and links
- Simulation of future in landscape ecology
- Landscape in changing socio-economic conditions
- Processes in landscape ecology
- Shifting paradigms and concepts in ecology
- Other aspects of landscape ecology

Official language

English is the official language of the Symposium. No simultaneous interpretation will be provided.

Location

The symposium will be located in Stará Lesná at the foot of the Lomnický Štít massif in the eastern part of the High Tatras Mountains, about 2 km distance from the town Tatranská Lomnica. The hotel has the advantage of being located in a beautiful, natural setting while at the same time being easily accessible (by road, train, bus and airplane). Numerous excursions are possible: within the High Tatras National Park in which the hotel is situated, and to neighbouring areas such as the Belianske Tatry Mts., Kežmarok and Levoča (mediaeval towns), Vrbov (thermal spa), Červený Kláštor (rafting on the river Dunajec), as well as to more distant ones, such as Prešov, Spiš Castle (UNESCO World Heritage) and Košice. The Polish part of the Tatra Mountains, centre at Zakopane, is also within easy reach.

Excursion

Symposium participants are invited to take part in one-day coach excursion which will be held on October 7, 2006.
